Paramedic

Description: Assess injuries, administer emergency medical care, and extricate trapped individuals.

Transport injured or sick persons to medical facilities.

Educational/Training Level:

Postsecondary vocational award

Annual Median Salary: \$22,500

beauty of college preparation. A well-constructed liberal arts curriculum will build your critical thinking skills. You'll learn how to communicate. You'll learn the history of our world, this nation, and your own commonwealth in ways that will help you avoid repeating the worst in our past. You'll know how to see the big picture.

That's crucial because the job

or career you choose will likely be part of a picture that includes the whole planet, not just the Bluegrass or the south-central portion of North America.

Your college education will teach you the languages, the

philosophies, and perhaps even the theology that guide the thinking of leaders in countries you've only

seen on product labels. You'll see science happening right in front of you, and you'll learn the kinds of math that could put numbers into equations changing the lives of millions.

Dental Hygienist

Description: Clean teeth and examine oral areas, head, and neck for signs of oral disease. May educate patients on oral hygiene, take and develop X-rays, or apply fluoride or sealants.

Educational/Training Level:

Associate degree

Annual Median Salary: \$51,300

Chef

Description: Direct the preparation, seasoning, and cooking of a variety of foods. May plan and price menu items, order supplies, and keep records and accounts.

Educational/Training:

Postsecondary vocational award

Annual Median Salary:

\$25,100

If you're smart about it, and if you work harder than you thought you ever could, you'll emerge a leader. And there will be employers out there who will fall all over each other to get you on their team.

So choose college. It's a decision that will follow you in ways you'll be glad about. 🍀

Pharmacist

Description: Dispense drugs prescribed by physicians and other health practitioners and provide information to patients about medications and their use. May advise physicians and other health practitioners on the selection, dosage, interactions, and side effects of medications.

Typical Educational/Training Level: First professional degree

Annual Median Salary: \$70,900
