

The Future is Now

Today's high school students are part of a world that is moving more quickly now than ever before. As new technology is introduced into our lives, we find our lives changing in remarkable ways. Likewise, the job market is evolving at a rapid pace as new high-tech tools alter the way in which we do business. And the trend doesn't show signs of slowing.

To be prepared to meet those changes, a solid educational foundation provides the best assurance of being able to succeed in our evolving world. You see, education is more than simply memorizing material out of books. Education is about learning to think, about learning to analyze and solve problems, about learning to understand the importance of dealing with others in a respectful manner. And, at its best, education continues well beyond the classroom. It's a state of mind.

I am proud of the successes we are seeing in schools throughout Kentucky and I am confident that Kentucky's 2004 graduates are ready for whatever tomorrow may hold. I offer my congratulations to you for completing one phase of your education and my best wishes to you as you step into the future.

Sincerely,
Gene Wilhoit
Kentucky Commissioner of Education

A large advertisement for Campbellsville University. The top half features the university's name in a large, black, serif font: 'Campbellsville' is on the top line, and 'UNIVERSITY' is on the line below it. Below the text is a photograph of a diverse group of seven students walking along a paved path on a campus. They are dressed in casual attire like sweaters and jeans. In the background, there are trees and a building with a sign that says 'Campbellsville University'. In the bottom right corner of the advertisement, the text reads: 'where you can Find your Calling' (with 'Find your Calling' in red), followed by the website 'www.campbellsville.edu' and the phone number '1.800.264.6014'.
